AVAILABLE OPTIONS / ACCESSORIES

INTAKE:

- METAL SCREEN
- LOUVER
- HOOD

FILTERS:

- NONE
- PERFECT PLEAT M8
- ALUMINUM
- HIGH EFFICIENCY FILTERS (MERV 11-15)

FILL & DRAIN KIT

MEDIA:

- 12" CELDEK
- 8" CELDEK
- 12" GLASDEK

MIST ELIMINATOR

- BT DESIGN

PIPING:

- PVC
- COPPER
- STAINLESS STEEL
- GALVANIZED

SUBMERSIBLE PUMP

CASING / FINISHING:

- GALVANIZED
- STAINLESS STEEL + WET SECTION
- 100% STAINLESS STEEL

2- POSITION INLET DAMPER

- MOTORIZED OR MANUAL DAMPER

WATER INDUCTOR

- PREVENTS SEDIMENT INCRUSTATION ON COOLING MEDIA
- 20 YEAR WARRANTY
- WITHOUT MAINTENANCE

FLANGES (DUCT CONNECTOR)

TIMED FLUSH SYSTEM WITH CHRONOMETER

PROVIDES COMFORT COOLING IN MANY CLIMATES WITHOUT THE USE OF COMPRESOR. STAGE II MODULE CAN BE LOCATED AT OUTSIDE AIR INTAKE ON CHILLED WATER SYSTEMS

EXAMPLE: EL PASO TX TEMPERATURES 101°F/70°F

DT= DB - (EF (DB-WB))

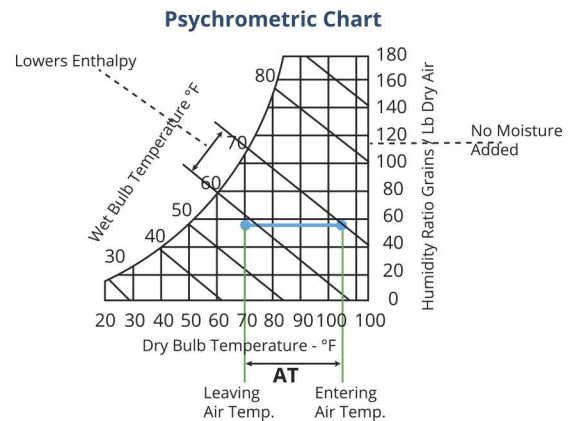

DT= DISCHARGE TEMPERATURE
 DB= DRY BULB
 EF= CELDEK EFFICIENCY
 WB= WET BULB

Indirect Stage:

DB= 101° F
 EF= 70% (BARNHART TAYLOR INTERCELL EFFICIENCY)
 WB= 70° F

TD= DB - (EF (DB-WB))

TD= 101 - (.70 (101 - 70))
TD= 79.3 °F

How the Stage II Works

Air flows through corrosion proof polymer heat exchanger in both vertical and horizontal air passages.

Water is evaporated in the vertical passages to cool the plates.

Outside air flowing in the alternating horizontal passages is then cooled by the plates without addition of moisture to the air streaming.

This process makes the stage II ideally for use in refrigerated air conditioning system.

FLANGES (ALUMINUM CONNECTOR)

TIMED FLUSH SYSTEM WITH CHRONOMETER

70% EF

88% EF

A DIRECT EVAPORATIVE (PENTPAK) SECTION CAN BE ADDED TO THE INTERCELL TO PRODUCE EVEN COOLER AIR

EXAMPLE: EL PASO TX TEMPERATURES 101°F/70°F

DT= DISCHARGE TEMPERATURE

DB= DRY BULB

EF= CELDEK EFFICIENCY

WB= WET BULB

INDIRECT + DIRECT

Indirect Stage:

DB= 101° F

EF= 70% (BARNHART TAYLOR INTERCELL EFFICIENCY)

WB= 70° F

TD= DB - (EF (DB-WB))

TD= 101 - (.70 (101- 66))

TD= 76.5° F

Direct Stage:

DB= 76.5° F

EF= 88% (12" MUNTERS CELDEK, V= 500 FPM EFFICIENCY)

WB= 70° F

TD= DB - (EF (DB-WB))

TD= 76.5° - (.88 (76.5 - 60))

TD= 61.9° F

Comparison of Single Stage Evaporative Cooling vs. 2-Stage

Direct Evaporative Media Only (State point 1-2)

This air stream starts at state point "a.1" (see psychrometric chart above). the air passes through a direct evaporative media such as munter's celdek. evaporating water passing over the media collects heat from the air stream. at 90% direct evaporative efficiency, the air cools to state point "2". this air stream is moved down to a lower dry bulb, but has also gained significant moisture content.

2-Stage Indirect and Direct Evaporative Media (State Point A-B-C)

This system is a combination including barnhart taylor intercell plate-to-plate heat exchanger and a direct evaporative section such as munter's celdek. water and air mix in the vertical (secondary) sections of the heat exchanger where exaporation takes place, thus carrying heat away. the heat is extracted from the horizontal (primary) air stream. starting at state point "a.1"; the main air stream passes through the narrow cool passages of the heat exchanger. improved thermal transfer walls and "mixing" studs cause the primary air stream to give up a portion of its sensible heat to the secondary air stream. when the primary air stream exits the heat exchanger, it is at state point "b". this air has been cooled to a lower dry bulb temperature, but has not gained any moisture. the air is now prime for direct evaporative cooling. state point "c" is the condition of the air ready to enter your building. compared to point "2" (for direct evaporative only), the 2-stage air has a much lower dry bulb as well as an overall lower moisture content.

INDIRECT AND DIRECT MODULE SIMPLIFIES DUCTING BY EXHAUSTING AIR THROUGH THE HEAT EXCHANGER ON APPLICATIONS

FEATURES & BENEFITS

PENT PAK

- 88% EFFICIENCY
- WATER FILTER
- STAINLESS STEEL 304 WET SECTION
- TIMED FLUSH SYSTEM
- 12" / 8" COOLING MEDIA
- PUMP PROTECTOR
- FLEXIBLE CONNECTORS
- OPTIONAL PIPING MATERIALS AVAILABLE (PVC, COPPER OR S.S.)
- GALVANIZED LOUVERS
- VOLUME CONTROL OPTIONS (Motorized or manual dampers)
- FILTER OPTIONS (MERV 8 – MERV 15)

INTERCELL

- 70% EFFICIENCY
- HIGH EFFICIENCY SECONDARY AXIAL FAN
- CASING: STAINLESS STEEL
- MIST ELIMINATOR
- OPTIONAL PIPING MATERIALS AVAILABLE (PVC, COPPER OR S.S.)
- GALVANIZED LOUVERS
- VOLUME CONTROL OPTIONS (MOTORIZED OR MANUAL DAMPERS)
- FILTER OPTIONS (MERV 8 – MERV 15)

XCELL UNITS (2-STAGE)

- ALL BENEFITS FROM PENT PAK AND INTERCELL COMBINED
- ΔT: 30F APROX. (DEPENDS OF THE OUTSIDE AIR)
- BUILT IN ECONOMIZER FUNCTION
- SEPARATE PRIMARY AND SECONDARY WATER CIRCUITS FOR OPTIMUM EFFICIENCY (STAINLESS STEEL)
- AUTOMATED WATER QUALITY MANAGEMENT SYSTEM, FIELD ADJUSTABLE FOR SPECIFIC SITE REQUIREMENTS
- WATER LIMIT SWITCHES FOR PUMP PROTECTION
- LOW MAINTENANCE
- PROVIDES EXCEPTIONAL PERFORMANCE
- HIGH EFFICIENCY COOLONG SYSTEM WITHOUT COMPRESSOR NEED
- OPTIONAL PIPING MATERIALS AVAILABLE (PVC, COPPER OR S.S.)
- GALVANIZED LOUVERS
- VOLUME CONTROL OPTIONS (MOTORIZED OR MANUAL DAMPERS)
- FILTER OPTIONS (MERV 8 – MERV 15)
- HIGH EFFICIENCY SECONDARY AXIAL FAN
